

Look into the box (C1)

<u>Target group</u>	5-6 year
<u>Material</u>	A box with a hole in it. Inside the box there are materials from the nature: sticks, stones, flowers, sand...
<u>Procedure</u>	<ul style="list-style-type: none">- The teacher puts some material in the box (he puts 5 or 3 things inside the box). It could be less or more it depends on the level of the children.- The teacher shows a picture of a thing which is in the box and a child has to put his hand inside the box and find it. Other children have to do the same. For example, the teacher gives a child a picture of a stone and he has to find it in the box and show it to the rest of the children.- After that the teacher can let the children search for new material to put inside the box. Then they have to put their hands inside the box and find a new material.
<u>Variations</u>	-With material from the class, fruits, other things,...
<u>Aims</u>	<ul style="list-style-type: none">- Develop one's visual and tactile memories.- Refine one's tactile perceptions.- Learn to distinguish different characteristics of different

	materials (contrasts: soft/hard, rough/ smooth,...) - Learn to identify elements from the environment by touching them.
<u>Comments</u>	- They can do it in the forest but also in the classroom or anywhere else if they can't go to the forest.
