

Decorate the city

<u>Target group</u>	4 - 6 years old
<u>Material</u>	Coloured wool Different fabrics Chalk Cardboards ...
<u>Procedure</u>	There are many ways to make the city more beautiful: <ul style="list-style-type: none"> - The "Yarn Bombing": it is wrapping elements like trees, dustbins, lights ... with coloured materials (see the picture) - Painting on the wall (if they choose this way, make an outline) - Surround elements with cardboards which is decorated and painted - ... After showing some examples to the children, go to the city and ask them what elements they would like to decorate and how they would like to do this. It must be possible (not too high for them, not

	<p>too far from school, no need of too much material ...). Take a picture of the place to remember it later.</p> <p>Before doing it in the city, train in other place at school to see what is it important to do (for example, if they wrap something, they must use string to attach the material).</p> <p>After training, go to the chosen place. Divide the children in smaller groups, each group chooses an element to wrap. The groups can each do different things. After this they can walk around and see what the other groups did.</p>
<u>Variations</u>	/
<u>Aims</u>	<p>Learn to observe in details</p> <p>Esthetic sense.</p> <p>Art: Act and create to observe, compare and discover</p>
<u>Comments</u>	Take pictures from the art, and then hang them in the school to talk about it later. And also so that the children have something to show to their parents.
