

Memory with nature stuff

<u>Target group</u>	4-5-6 years old
<u>Material</u>	a box with a cover, objects from the nature (stones, leaves, branches...)
<u>Procedure</u>	We go to the nature or to a park and we ask the children to collect stuff from nature and bring them to the starting place. There every child can touch and watch these objects thoroughly. After that we put these objects into a box. The children put their hands into the covered box and they have to guess what's the name of the object that they touch.
<u>Variations</u>	for little children : less things for elder children: any natural stuff
<u>Aims</u>	Develop the memory
<u>Comments</u>	the children can play it in the park, where they collected these stuffs and can go back to the classroom and there they can start the guessing part of the game.
