

Find the perspective

<u>Target group</u>	4-6 years old
<u>Material</u>	none
<u>Procedure</u>	The teacher has to make photos from a building, tree, or from some other objects from a square or garden. The pictures are printed each twice. Therefore the teacher has covered half or a part of the picture for one of the prints. The children go to that place with the teacher and look around everything thoroughly. When they have finished observing the surroundings, the teacher gives a covered picture to each child and he has to search for the place or object which is in the photo. When they have found it, the teacher gives them the full picture.
<u>Variations</u>	covering variations- depends for ages
<u>Aims</u>	Develop collaboration Develop imagination
<u>Comments</u>	For the youngest : pictures of a whole building, For elder children: a part of a building
