

## Personal reflection :

I think that during this experience I grew up because I learned so many things! During this two weeks , I always spoke in English and it really was a good thing because now my English is better !

In the beginning of this programme I was a little bit afraid because I had not practiced my English for 5 years but everybody understood me so I was proud of myself!

I really wanted to participate in this intensive programme and I don't regret it.

I discovered a lot of beautiful places ! I felt good in this programme and always happy to be there.

My first motivation to come on this intensive programme was really to meet people of everywhere and speak with them and learn different things about their country.

And I really enjoyed these meetings ! All people were open to discuss ! We took a lot of pleasure! Always in a good mood !

There was an exchange with all people, everybody wanted to learn some words in the other languages and it was really funny to see that people were interested by our culture.

It was a human experience and I don't regret to have participated in it.

I discovered a lot of things about the education systems of the other countries! And now I can say that certain things are better in Belgium but also certain things are better in other countries.

When we went to the school to see the children and to teach them I was anxious because I didn't know if they understood English or not, and I don't speak Spanish so it was a little bit frightening. But finally the children understood English so it was easier to communicate.

Strale Maryse  
Belgium- Namur

I really loved to teach them. It was enriching.

I learned a lot of things and with the lesson plans I have now so many ideas for my practice in Belgium .

It was really a good experience and I enjoyed it !!!!!
