

Step by step (C2)

<u>Target group</u>	3-4-5 years (differences according to the age)
<u>Material</u>	- Pictures with steps of the creation of an installation
<u>Procedure</u>	- Give the pictures mixed up - Ask the children to put them in the order of the construction
<u>Variations</u>	- The final result can serve to do another installation - Different level according to the age (3 steps for little children and maybe ten step for the oldest) - Children do the same in groups and pictures are taken for the other children to find the different steps
<u>Aims</u>	- Learn to observe in details - Learn to compare, find out differences and similarities - Logical order
