

# Personal reflection

I really liked this two weeks, because I found a lot of new qualities in my our personality and I learned so many games. I hope I can show the activities to a lot of people at home and I hope we can fresh up the old games with some new ones. It's really good that I can teach games from Lithuania, Belgium, Denmark, Germany, Spain and Portugal. I loved the running game that we played with Denis, because I felt the differences between the freedom and the prison and we just ran one side to the other, but now I know what is under a simple game. (I never thought when I'm running I can feel the freedom, but in this game we were running with our hands in

our pockets and it showed why freedom is so important). I learned a lot of natural games from Filip, for example the CD-game. We just had a paper which looked like a CD and searched a place where we can sit down and just listened to the forest. It was awesome, because I never thought only one piece of paper would be enough to calm down

and I think the children can feel the same. It was a very good place to learn a new teaching style from another culture. We could find the similar things betwen our teaching program and other countries' programs. I learned lots of games and fine things from the teachers, from the students (friends) and the

children. Thank you to everybody, because we together made a great trip and I think everybody learned more in these two weeks than in one year at the school.
