

# Personal reflection

---

First something about me. I'm Burcu Uraz, come from Esslingen (Germany) and I'm 21 years old. I study "Frühe Bildung" in Schwäbisch Gmünd. I love to play and use my time for and with Kids. That's one of the reasons why I choose a Job like this for my own future.

At the beginning I had many questions which I can answer know. For example it was hard for me when I heard that we don't have Internet, but now I thank the teachers because I found here very good friends and we communicated very good. We laugh and cry together, on the difficult times we are there for each other, we were like a little family here.

But the Best Part of this education is that I learned a many things from professional Persons. We heard to Persons from other cultures and speak about their problems. They showed us how to we can use and care our nature. Sometimes it was hard to understand what the teachers want to say to me, but at the and I understand. I learned here that we can be very creative when we let our imagine free. Only in the forest you can created so many different games or something else.

Its perfect to learn how to work with the sences and use it on the best time. We learned here to work with all the senses.

I will thank every Persons who were the creator of this intensive Program. And to all the friendly peoples who were there for me when I need them. It's awsome to meet Persons like you. Sarah, Sara N. Laura, Amelie, Viktorija, Vivien, Kinga and Bence I will miss you all.
