

My name is Verónica Díez Berrendero. I'm from Spain and I'm studying in ESCUNI (Madrid).

I chose to do this program because I thought that it was very interesting and it was.

In these two weeks I have been through a lot of things and learned about the different activities, cultures and other students.

The first day I felt lost because I didn't know anything but as the time was passing I felt better because I could understand languages and I got to know other people.

I'm really happy with my workshop because we have been linked and we have worked comfortably.

The most surprising in the group is that we had a lot of ideas and we were very motivated and this was really the funniest.

Maybe, the most difficult was that there were people that didn't speak English and others translated.

In the professional field this program was a good experience because all I learned will be of use in the future with children because during that 12 days I have learned other languages and I have improved my English.

Really, this Intensive Program has been a pleasant program and if I had another opportunity I would repeat it.

Finally, I have said that all the best moments that I spent were with a lot of people from other countries like Germany but in special with Portuguese people.
